

HYBRID TEA ROSE PLANT NAMED 'RUIZ99925'

CLASSIFICATION

The present invention relates to a new Hybrid Tea Rose, ~~sp. Rosaceae~~ Rosa hybrid.

VARIETY DENOMINATION

5 The new rose plant has the varietal name 'RUIZ99925'.

BACKGROUND OF THE INVENTION

The present invention relates to a new and distinct variety of rose plant of the Hybrid Tea rose class, which was created by crossing as seed parent and pollen parents unnamed, undistributed seedlings. The varietal denomination of this new rose is named 'RUIZ99925'.

10 SUMMARY OF THE INVENTION

Among the novel characteristics possessed by this new variety which distinguishes it from its parents and all other varieties of which I am aware are its unusual and attractive flowers exhibiting yellow cream central petals and greenish-hued outer petals.

15 Asexual reproduction by propagation by grafting and vegetative cutting of the new variety as performed in De Kwakel, The Netherlands shows that the foregoing and other distinguishing characteristics come true to form and are established and transmitted through succeeding propagation.

COMPARISON WITH PARENTS

20 Among other respects, the new variety differs from its parents in flower color. The seed parent and the pollen parent are unknown; the new variety was discovered as a single seedling in a controlled planting of mixed rose varieties.

BRIEF DESCRIPTION OF ILLUSTRATIONS

25 The accompanying illustration show a typical specimens of the new variety depicted in color as nearly true as is reasonably possible to make the same in a color illustration of this character. FIG. 1 shows: new growth 1; leaflets 2, 3 and 4; stem with thorns 5; flowers in

50509/CAB/D214

different stages of development 6, 7, 8 and 9; and reproductive organs 10, 11 and 12. FIG. 2 shows a flower of the new variety about 1/3 to 1/2 open.

DESCRIPTION OF THE NEW VARIETY

The following is a detailed description of the new variety with color terminology in accordance with the *Royal Horticultural Society Colour Chart* (RHSCC). The terminology used in color description herein refers to plate numbers in the aforementioned color chart. Phenotypic expression may vary with light availability, environmental and cultural conditions.

The following observations are made of 9-month old plants grown in a greenhouse in De Kwakel, The Netherlands during May from a grafted cutting. The plant was grown in a 12 liter pot with a coco peat substrate. Average day temperature was between 20 and 22 degrees Celsius. The plant was grown on its own roots.

FLOWER

	Blooming Habit:	Continuous
	Bud	
15	Size:	About 5 cm long, about 4 cm wide
	Form:	Wide ovate
	Color	
	Outside:	Near 3C at base to near 4D in middle, margin near 144D
20	Inner Side:	Base near 9C, middle near 19C, margin near 144D
	Sepals:	Just before opening sepals are as long as the bud, about 5 cm, about 1 cm wide at base, occasionally one of the sepals has a leaf-like <u>foliaceous</u> end
25	Upper Surface:	Smooth, near 144A
	Undersurface:	Hairy, near 144A
	Peduncle	

50509/CAB/D214

	Length:	About 12 cm
	<u>Diameter:</u>	<u>about 6-8 mm</u>
	Aspect:	Smooth with few prickles at the base
	Strength:	Strong, erect
5	Color:	Near 144A
	Bloom	
	Size:	Average size when fully open about 12 cm
	Borne:	Singly
10	Form:	Shape viewed from above is irregularly round; upper part is flattened convex; lower part is flat
	Petalage:	About 35 petals
	Color (1/3 to 1/2 open)	
	Outer Petals	
	Top Surface:	Near 150D, margin near 149B
15	Undersurface:	Near 150D, margin near 145B
	Inner Petals:	
	Top Surface:	Near 19C
	Undersurface:	Near 11D
	Base of Petals	
20	(point of attachment):	Near 10C
	General tonality from a distance:	Light yellow-pink
	Color (Fully Open)	
	Outer Petals	
	Top Surface:	Near 1D, margin near 144C
25	Undersurface:	Near 1D, margin near 144C
	Inner Petals	
	Top Surface:	Near 19B, margin near 27A
	Undersurface:	Near 10C

50509/CAB/D214

	Base of Petals	
	(point of attachment):	Near 7A
	General tonality from a distance:	Orange-pink with green margin
	Color Change:	
5	As bloom ages:	The yellow bud develops into a green-colored flower with a pink inner surface
	Petal top surface:	Near 150D
	Petal undersurface:	Near 150D
	General tonality at a distance:	Cream-pink
10	Petals	
	<u>Length:</u>	<u>About 5.3 to 5.7 cm</u>
	<u>Width</u>	<u>About 5.0 to 5.5 cm</u>
	Texture:	Inner side smooth, outside veined
	Appearance	
15	Inside:	Satiny
	Outside:	Satiny
	Form:	Elliptic
	Arrangement:	Imbricated
	<u>Petaloid:</u>	
20	<u>Color:</u>	<u>Upper color, between 9C and 10B, sometimes lightly blushed between 27A and 27D</u>
	<u>Texture:</u>	<u>Thick</u>
	<u>Size:</u>	<u>Length approximately 1.5 cm to about 3.5 cm; width approximately 0.8 cm to 1.7</u>
25	Petaloids in center:	About 7
	Persistence:	Petals are persistent
	Fragrance:	Weak
	Lasting quality	
	Vase life:	About 20 days

50509/CAB/D214

REPRODUCTIVE ORGANS

Stamens, Filaments and Anthers

Arrangement: Irregularly around styles, about 50 stamens

Color

5 Stamens: Near 7B

Filaments: Near 9C, about 5 mm long

Anthers: Near 13C

Pollen Not abundant

Color: Near 199D

10 Styles: Uneven length 7 to 12 mm, near 8D

Stigmas

Pistil: About 0.9 cm to about 1.4 cm in length,
twisting and chary; color near 4D

Color: Near 22B

15 Hips: Seed production has not been observed

PLANT

Form: Upright growing, long strong stems

Growth: Vigorous, uniform branching

Height Attained (first season): About 200 cm

20 Foliage: Average per stem from bottom to top:
2x5 leaflets, 3x7 leaflets, 2x5 leaflets, 3x3
leaflets

Compound leaves: 5 leaflets about 17 cm in length, width about 13
cm

25 Terminal leaflets About 8 to 9.5 cm in length and about 5.5 to
about 6.5 wide

Size: About 10 cm long, width about 6 cm

Quantity: About 10 leaflets per stem

Color

50509/CAB/D214

	New foliage	
	Upper Side:	Shoot length about 30 cm, near 137C
	Underside:	Near 148B
	Mature foliage	
5	Upper Side:	Stem length about 90 cm, near 139A
	Underside:	Near 138 B
	Shape:	Elliptic
	Texture	
	Upper Side:	Glossy
10	Underside:	Matte
	Edge:	Serrated
	Serration (type):	Serrate
	Petiole	
	Top Surface:	Near 138B
15	Underside:	Near 145B
	Stipules:	Length about 22 mm, width about 9 mm; top surface smooth; color near 144B; undersurface smooth near 138B; <u>shape - scale-like, margin serrate</u>
20	Auricle:	Length about 15 mm, width about 4 mm; margin, hairy, color near 138A
	Rachis	
	<u>Length:</u>	<u>Approximately 3 to about 5 mm.</u>
	<u>Diameter:</u>	<u>Approximately 2 mm</u>
25	Top Surface:	Smooth with raised border, color near 137C
	Undersurface:	Smooth and with a few prickles, color near 138C
	Resistance to Disease	
	Blackspot:	No natural resistance

50509/CAB/D214

	Mildew:	No natural resistance
	Rust:	No natural resistance
	Wood	
	<u>Diameter of stems</u>	<u>About 7 to 9 mm, internode length about 6 to 8</u>
5		<u>cm.</u>
	New shoots:	Shoot length about 30 cm
	Color:	Near 138A
	Bark:	Smooth
	Old wood	
10	Color:	Near 139B
	Bark:	Smooth
	Flower stem:	About 90 to 100 cm
	Thorns	
	<u>Number:</u>	<u>Approximately 5 to 9 per stem</u>
15	Form:	Concave
	Length:	About 9 mm
	Color (when young)	Near 175A
	Position:	<u>Irregular; scattered over the 6 lowest internodes</u>
	Prickles:	Color near 181A
20	Winter Hardiness:	Not known, only grown in a glasshouse

50509/CAB/D214

I CLAIM:

1. A new and distinct Hybrid Tea Rose plant of the variety substantially as shown and described.

50509/CAB/D214

ABSTRACT

A new and distinct Hybrid Tea Rose plant having flowers with yellow cream central petals and greenish outer petals.
